PROFILE

Systems and Computing Engineer with solid experience in backend, DevSecOps, and cloud environments. Skilled in AWS, Azure, Docker, Terraform, and automation with Bash and Git. At Sofka, I design Azure architectures for Sura with a focus on security and monitoring through Sentinel, managing automation and infrastructure as code. Experienced in access management (IAM) and CI/CD with GitLab and Azure DevOps, integrating SIEM/SOAR solutions such as Sentinel and Splunk. At Ditech, I led AWS migrations and security strategies for clients like Inmotion, HDI, and Liberty Mutual, and at Avenfor, I promoted the DevOps culture with a strong focus on quality and efficiency. Recognized for discipline, adaptability, and effective collaboration.

WORK EXPERIENCE

08/2025 - Present

DevSecOps Engineer

Sofka Technologie

Designed Azure architecture for client Sura, with a focus on security and monitoring using Azure Sentinel. Implemented infrastructure automation and security controls with Terraform.

04/2024 - 08/2025

DevSecOps Engineer

Ditech Group

Led AWS-to-AWS migration, automated processes, and implemented security using SIEM and SOAR tools such as Azure Sentinel and Splunk for clients including HDI and Liberty Mutual.

09/2023 - 04/2024

DevSecOps Developer

Avenfor

Designed AWS architecture and CI/CD pipelines with GitLab. Implemented cloud security practices and worked with clients such as EPM.

EDUCATION

Systems and computing engineering

EIA University

2018 - 2023
